Education

Netaji Subhas University of Technology (NSUT) — New Delhi, India
B.Tech in Computer Science & Engineering (Specialization in Mathematics & Computing) — *2022 – 2026*

Work Experience

Magicpin — Gurugram, India
Tech Product Analyst — *Aug'26 – Present*

- Built an automated merchant reactivation pipeline for inactive/high-cancellation merchants, **reducing cancellations from 10–12% to 4–6%**.
- Built automated ingestion and pricing pipeline integrating competitor crawlers and POS webhooks to eliminate catalog deficits (items ≤ 8, image coverage $< 60\%$); deployed fuzzy dish-matching to enforce 1:1 base MRP parity against competitor benchmarks, eliminating friction for low-CVR merchants (<1%) while protecting platform discount layers.
- Engineered real-time merchant funnel telemetry (DAU → Views → Carts → Orders); diagnosed low-conversion cohorts (<1% CVR) and resolved listing glitches on premium surfaces (Magic9).
- Developing merchant-level opportunity analysis across 7 mega cities, mapping locality- and item-level demand/search gaps against inactive supply to drive targeted activation and onboarding.

Lifelong Online — Gurugram, India
Business Analyst — *Feb'26 – Aug'26*

- Built an end-to-end ERP automation pipeline (Python, Playwright, pandas) that auto-downloads, merges, and consolidates SKU-level PO/GRN/ATP data — **eliminating 3–4 hours of daily manual reporting**.
- Engineered cross-source data pipelines merging 6+ datasets (Item Master, PO files, Blinkit FC, SKU master) with audit trails flagging unmapped records for procurement accuracy.
- Developed and deployed an internal Sticker Generator platform from scratch, enabling business teams to self-serve custom product sticker creation.
- Built an automated quick-commerce competitive pricing scraper using Python and Playwright to extract real-time product prices.

NOM — Remote
Founding Product Manager — *May'25 – Nov'25*

- Conducted market research and competitor benchmarking to inform product strategy and validate key features during early-stage development.
- Designed product flow architecture integrating LLM capabilities for scalable feature development; owned QA testing and collaborated with developers to refine features.
- Architected LLM workflows, structured prompt engineering, and automated evaluation pipelines to improve output accuracy and coverage.

Projects

Autonomous Multi-Agent Career & Outreach Engine | *Python, Playwright, SQLite, Discord API, Gemini LLM* — 2026

- **Distributed Multi-Agent Architecture:** Architected a production-grade multi-agent system orchestrating 4 specialized autonomous workers (DOM Form Filler, Lead Enrichment Engine, DNS/SMTP Verifier, and Discord Remote Controller).
- **Application Automation Pipeline:** Built an autonomous job application pipeline using Playwright CDP that dynamically solves multi-step forms, handles contenteditable screening chatbots, and navigates external career redirects across Naukri, Indeed, and Google Forms — **submitting 100+ applications autonomously**.
- **Pipeline & Anti-Bot Engineering:** Designed transactional SQLite queue pipelines processing 4,000+ candidate profiles with stealth CDP injection, humanized mouse-wheel physics, and velocity throttles to bypass anti-bot detections.
- **Remote Command Center:** Integrated a conversational Discord bot daemon over WebSockets enabling real-time mobile telemetry, asynchronous shell execution, and live pipeline control.

Technical Skills

Programming & Languages: Python, SQL, C++, C, JavaScript, Bash
Tools & Frameworks: Playwright, SQLite, Git, Discord API, Cloudflare Tunnels, Pandas, Linux Daemons, Postman
AI & Automation: Multi-Agent Systems, Agentic Workflows, Google Gemini API, Prompt Engineering, Web Automation
Core Competencies: Product Analytics, Funnel Telemetry, Conversion Rate Optimization (CRO), ERP Automation, System Design

Positions of Responsibility

Moksha Innovision 2024 (NSUT Annual Cultural Fest) — New Delhi, India
Sponsorship & Collaboration Lead — *Dec'23 – Mar'24*

- Secured monetary and in-kind corporate sponsorships; negotiated deliverable contracts and ensured timely fulfillment of branding and stage visibility commitments.
- Coordinated cross-functional teams to align sponsor activations with fest event logistics and marketing campaigns.
